Action Information		
Description: A tree falling tree impacted a transformer on a pole spilling the transformer oil. The electric wires caused the tree to catch on fire. The released oil was diked but the water used to extinguish the fire overwhelmed the dike and approximately one pint of oil was discharged to the street sewer catch basin. The catch basin was secured with boom and absorbents and no oil migrated beyond the catch basin. The catch basin will be further cleaned in the morning after the power line is de-electrified. The oil analysis results are not yet available.
